Armchair TUTTU Aviator

254 usd

- Withdrawn from series production and replaced by the universal TUTTU Monteur model.
- Designed and manufactured in Ukraine, with love!

As children, my brothers and I loved to listen to grandfather's stories about life, begging for them at any opportunity, perched on the floor around the chair. And with which he spoiled us from time to time, slowly leading a leisurely thread of the story, with distractions to detailed details, sitting on his chair - the same lover of stories of the past! Inspired by childhood memories, we set about reincarnating an archaic object that became such a close and silent witness to us as we grew up. In our interpretation, the heroes of the past come to life, like a chameleon, taking on the surroundings of the story's setting. Working through the details of the collection and finishing materials, we created four brutal archetypes from the stories of our grandfather, associated with the types of activities we remember: Savant (engineer), Lumberer (woodcutter), Farmer (peasant), Aviator (pilot). Having abandoned the classic image, we left the form based on an open look, clear content and comfortable fit, naming the collection with the invented pleasant word Tuttu.

The TUTTU Aviator image is based on elements of the uniform of pilots and mechanics. Deliberately rough canvas fabric, contrasting stitching, straps, buckles, a fake side number, as well as straps that tighten the seat and back, pressing them to the frame. These details form an object associated with the heroism and courage of the first conquerors of the heavenly ocean.

Designer: Sergey Lvov
Year of creation: 2019

Height:	800 mm
Width:	676 mm
Depth:	805 mm

Materials and instructions

Frame: steel pipe 16 mm, powder painting, plastic lining. Soft part: removable outer textile cover, Khaki cotton tarpaulin, textile slings. Filling: holofiber. Care: Vacuum the outer cover regularly with the brush attachment. Fresh stains should be blotted immediately with a clean, absorbent cloth. The maximum load on the product is 200 kg.
