Open steel shelving unit Igapo

471 usd

- Bold shelf design will arouse the constant interest of your guests.
- Designed and manufactured in Ukraine, with love!

The collection is inspired by rainforest vegetation in a new version. The name Igapo comes from the term used in Brazil to describe the flooded forests in the Amazon basin. A special feature of the collection is the interpretation of the image of the evergreen plant Monstera deliciosa, which has found an original application in the home. Such exotic design of open shelves will cause constant interest of your guests. The shelving unit is a vertical storage system, with convenient height between shelves-leaves that will always have enough sunlight. They are inserted into the frame and fixed thanks to precise folds around the perimeter. We have carefully placed silicone pads under the shelves, for comfortable use without the clanging sound of metal. And your parquet floor is protected by rubber feet.

Designer: Sergei Lvov

Year of creation: 2019

Height: 1860 mm

Width: 510 mm

Depth: 510 mm

Materials and instructions

Frame: steel tube, steel plate, powder coating, floor protection pads, brass hallmark of authenticity.
