abstra kitchen

Open modular steel shelving Abstra kitchen

248 usd

- Combine functionality, quality and aesthetics.
- Create your own module configurations to suit your storage needs.
- You can order either a set or individual modules to suit your space.
- Designed and manufactured in Ukraine, with love!

The Abstra collection is a versatile storage solution made up of cubic modules. It is an interpretation of the European avant-garde designs of the 1920s. The linear composition is characterised by an abundance of air between the units. On the surface of the shelves there is a playful ornament of geometric abstraction that introduces visual diversity.

The minimalist design opens up endless possibilities for home decoration combinations: you can choose a single shelf to place your décor on, or create your own ensemble. Place personal items that make your home feel cosy, like jars of cereal and condiments in the kitchen, or toys and books in the nursery. You can even hang them in the office to keep the files and folders you need at your fingertips. Abstra will support you in any aspect of your life!

Designer: Sergei Lvov
Year of creation: 2020

Height:	630 mm
