# Decorative steel planter Aiuola 50 cm

166 usd

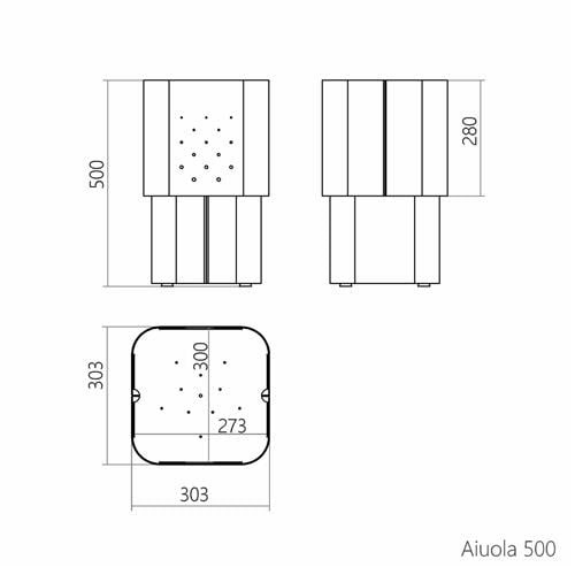

- Winner of the Portuguese design award LOOP Design Awards 2023.
- Brings high-precision production to the art of floriculture.
- Its comfortable proportions allow you to create green islands of vegetation beneficial for psychological health.
- Designed and manufactured in Ukraine, with love.

The Aiuola cachepot is an expressive solution for landscaping public spaces. The combination of rounded shapes and a nuanced colour palette has created a decorative planter with a strong personality. The single cachepot has a monumental appearance with smooth curves of the body. For its realisation, a special arc radius of the press brake is used. The result is four u-shaped steel sheets, with air perforations on the walls, joined by elegant joints. The bottom of the enclosure is laser -cut, with extra rigidity for secure installation and handling.

Place Aiuola singly, or make your own compositions or decorative hedges to divide the space. This makes it suitable for use in contemporary galleries, museums and entertainment centre lobbies. It is also possible to use the cachepots in an entryway or on a terrace. Aiuola is available in two standard heights of 350 and 500 mm. Customised sizes are available on request.

Designer: Sergei Lvov
