

Wooden garden armchair TUTTU Gradar

310 usd

- Modern garden armchair with minimalist design.
- Designed and manufactured in Ukraine, with love!

TUTTU Gradar is a continuation of the chair series of the same name, with a minimalist design. The new modification is designed as outdoor furniture for terraces, gardens and urban spaces. The armchair takes its name from an obsolete synonym of the word "gardener". It is the personification of a kind, simple-minded character who carefully tends and nurtures his garden, carefully observing its seasonal transformation.

The new design continues the exploration of steel tube bending techniques, combined with wooden elements. The smooth lines of the design form a sturdy frame to which the seat and backrest made of wooden slats are attached. They provide a balance of comfort and operational reliability for outdoor use. Protected with a hard waxed outdoor oil, the seat allows water to drain away, which means it dries faster after rain, ideal for outdoor relaxation.

Designer: Sergei Lvov

Year of creation: 2020

Height: 700 mm

Width: 675 mm

Depth: 755 mm

Materials and instructions

Frame: 16 mm steel tube, powder-coated, pads floor protectors. Seat and backrest: 20 mm solid ash wood slats. Coatings and finishes: OSMO hardwax-oil (Germany). Care: remove the armchairs or the removable upholstered part from the rain. Dry and clean regularly. Cover all garden furniture at night with water-repellent covers. During long periods of disuse and in winter, store the chairs in a utility room.
