

## High stool Morsetto

631 usd

- The idea for the project was born after a meeting with Diza collective in Milan during the Salone del Mobile exhibition.
- It became a response to the growing demand for local furniture for premium spaces in the HoReCa segment.
- Inspired by vintage clamps we discovered in a carpentry workshop in northern Italy.
- A subtle reference to traditional Italian craftsmanship, acting as a teleport to a vibrant, carefree reality and an emotional provenance to share with your guests.
- Designed in collaboration with Diza collective.

Morsetto is a multifunctional chair collection. It enables the creation of a harmonious furnishing system for hotels and apartment complexes with a unified identity. The design of Morsetto is based on a balance between formal rigor and the richness of refined details. The collection features monumental soft elements, flowing backrests, and ergonomic proportions. Additional aesthetic value is provided by the solid base with intriguing rounded legs made of hardwood.

The Italian name is inspired by elegant vintage wooden clamps. This traditional tool from artisan workshops was used to carefully secure components. It has been reimaged in a contemporary form through the rounded wooden supports, which act as a unifying element of the collection. Their diagonal arrangement creates a sense of tension, seamlessly connecting the elements into a cohesive composition.

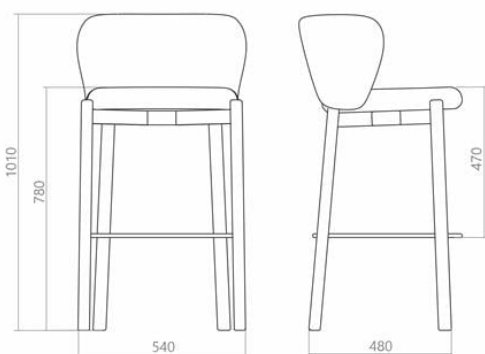

Designer: Sergei Lvov

Year of creation: 2024

Height: 1010 mm

Width: 540 mm

Depth: 480 mm

### Package information

Reliable cardboard packaging with protective film and foam. Package quantity: 1 piece.

Dimensions: 1040×560×500 mm. Weight with packaging: 16 kg. Delivered fully assembled.
