The hallmark of the Krater table (from the greek meaning "ancient bowl" is a floor bowl, as if made of paper rolled into an unpretentious origami figure. It was inspired by the wilful nature of our cat, who prefers to sleep in secluded places. The resulting free space under the table top will become a cosy resting place for the pet, as well as ideal for storing useful small things. The table was selected for the Ukrainian stand Diffusion within the framework of the French design week Paris Design Week 2018.
