Floor-standing coat rack Skala

360 usd

- During a crowded party, the entire frame serves as horizontal storage cells.
- Designed and manufactured in Ukraine, with love!

The Skala rack symbolises a sturdy object, in the form of a pointed mountain, serving as a place to place clothes. The metallic chaos of lines taper smoothly towards the top, representing the steep slopes on which wardrobe items can be placed. The architectural structure is rounded off by brass ends converging into cylinders.

Designer: Sergei Lvov
Year of creation: 2016
