Large steel planter Tarma

429 usd

- Place the plant in its own pot with proper drainage.
- Designed and manufactured in Ukraine, with love!

The cachepots are inspired by natural processes: in Norwegian, tarma means "subsoil" — something that lies beneath the surface and can escape. The flower stems sticking out of the cachepots and the leaves spreading out symbolise the streams from the bowels of the earth rushing up to the sky. The plasticity of the plants is particularly emphasised by the geometric shape of the Tarma and its flat edges. Every year you will witness the cycle of plant awakening, flower eruption, and fading into winter dormancy.

Designer: Sergei Lvov

Year of creation: 2018

Height: 460 mm

Depth: 700 mm

Width: 700 mm

Materials and instructions

Frame: steel plate 1.5 mm, powder coating, floor protection pads, brass hallmark of authenticity. Care: place the plant in its own pot with proper drainage, open moist soil can distort the surface.
