# Square wooden coffee table and metal base Lafett

240 usd

- The table top is made using joinery techniques to assemble picture frames.
- The design combines clean lines with an accent on the metal base and fringed edge.
- The end features the Levantin design logo in brass, while the table top has the serial number and the designer's signature underneath.
- Designed and made in Ukraine, with love!

The Lafett compact table is made up of a solid ash wood plateau top and a rectangular base. The combination of pure forms, forms a monolithic silhouette. The project is based on a brutal prototype: lafett was a log with rectangular walls, and then a cannon placed on a wooden pedestal from the French l'affût. Your gadgets, magazines and books will be conveniently placed on the noble surface of the table. And the decorative border of the table top will help your accessories to always lie in their place.

Designer: Sergei Lvov
Year of creation: 2016
