Two-seater ash bench with back Massless

644 usd

- One of the first items with a recognisable geometric style.
- Designed and made in Ukraine, with love!

A modification of the Massless bench with a comfortable backrest. Its design is a revitalisation of a classic interior object in a new form, floating in space without any tangible support. The design of the bench is inspired by Scandinavian style: a traditional heavy wooden seat and a slim support structure. It epitomises the contrast of warm wood and cold metal.

Designer: Sergei Lvov
Year of creation: 2014

Height:	875 mm
Width:	1400 mm
Depth:	500 mm
